

TTC delays: when they happen and how to be punctual*

Insight into when delays disproportionately tend to happen and related statistics

Andrew Goh

September 23, 2024

TBA

1 Introduction

You can and should cross-reference sections and sub-sections. We use R Core Team (2023), Gelfand (2022), and Wickham et al. (2019).

The remainder of this paper is structured as follows. Section [2](#)

2 Data

Some of our data is of penguins ([?@fig-marriage](#)), from Horst, Hill, and Gorman (2020).

`here()` starts at `/home/rstudio/TTCDelays`

Talk more about it.

And also planes ([?@fig-planes](#)). (You can change the height and width, but don't worry about doing that until you have finished every other aspect of the paper - Quarto will try to make it look nice and the defaults usually work well once you have enough text.)

*Code and data are available at: [LINK](#).

Average Delays by Hour of Day (Subway vs Bus)

Figure 1: Subway delays w.r.t. time of day

Total Subway Delays by Hour of Day

Figure 2: total delay times

Total Subway Delays by Hour of Day Adjusted for Load Differen

Figure 3: delay time adjusted for the approximate subway load

3 Discussion

3.1 First discussion point

If my paper were 10 pages, then should be at least 2.5 pages. The discussion is a chance to show off what you know and what you learnt from all this.

3.2 Second discussion point

3.3 Third discussion point

3.4 Weaknesses and next steps

Weaknesses and next steps should also be included.

Appendix

A Additional data details
